

## PROVIDE A PLACE AND RESOURCES TO STUDY.

Provide children with convenient, quiet, and comfortable work areas, along with whatever resources are needed to study math and complete assignments. Encourage the use of reference materials (such as dictionaries and encyclopedias), and provide a computer and calculator if possible. If a computer is not available in the home, plan regular visits to a public library or community learning center where access is available.

The computer has become a common and essential tool in learning many school subjects, particularly mathematics and science. You and your children can use the computer to:

- \*Produce reports and assignments using word processing programs, spreadsheets, and other software.
- \*Find information from reference materials on CD-ROMS. Many are typically available from school and public libraries.
- \*Use commercial software packages that teach math skills in interesting and enjoyable ways.
- \*Access the abundant math and homework resources and assistance freely available on the Internet.
